TwinFinder

Electronic detector for metal and live wires.

- This device permits targeted scanning for metals such as reinforcing iron, heating pipes and water pipes.
- The position of live cables and wires can be precisely determined.
- Locating areas between uprights that are free from sub-structures, e.g. for making breakthroughs (kitchen hatches, skylights).
- Enables you to work with certainty and avoid drilling holes in the wrong places – so no need for subsequent repairs.
- Voltage warning: more safety when drilling! The AV voltage alarm warns continuously of live, unshielded wires.
